Be sure the correct player number is serving

➢ Check the player # every time a server goes back to serve

➢ If <u>not</u> the correct player number serving notify the referee immediately there is a wrong server

➢ Remember – they are not the wrong server until they <u>contact</u> the ball for serve

Home serves and loses the rally. Place the loss of rally/end of service mark in the next box for Home.
Give the loss of rally point to the Visitor team.

The Libero Tracker tracks all Libero replacements and all substitutions. For example, if Visitor requests a substitution, #6 for #5, the libero tracker would record that action by slashing the "5" and writing a "6" immediately to the right of the of the slashed "5".

Only #26 may re-enter the game for the libero; a proper replacement results in the same number being entered on both the left and right of the "L" on the tracking sheet. The Libero Tracker must notify the second referee immediately if an improper libero replacement occurs.

Remember – the last numbers written on each line of the Libero Tracking Sheet should always reflect the six players that are on the court.

➢ What if a team does not have a Libero?

No tracking will take place for that team

➢ Note- A different libero can be designated for each set, but the designation must be made on the lineup sheet when it is submitted to the official scorer before the set.

➢ During a time out, the Libero Tracker is to inform the R2 if the libero is 'on' of 'off' the court for each team when the time-out was requested.

In addition to recording the libero exchanges, the libero tracker must note the serving position of the libero to help ensure that the libero only serves in one position in each set. When a libero contacts the ball to serve, a triangle is drawn around the corresponding Roman numeral in the "Serving Order" column to note the libero service position. This will be the only service position where the libero can serve for the remainder of the current set.
